PROFILE

I'm a polyglot software developer with skills from database management to web page markup, although I enjoy being in between. I can code with Nodejs, Vue, Angular 2+, .NET Core, and GoLang using Gorilla Mux. When I'm not writing code, I'm usually on a hike or managing my YouTube channel. My Github profile is my pride, and I am currently sponsoring Deno (a secure runtime for JavaScript and TypeScript).

EMPLOYMENT HISTORY

Front-end Developer at Nologo Studios, Westville

February 2018 — March 2019

Mainly responsible for maintaining and building web pages for client-facing applications built with C# (MVC and WebForms) and Angular.

Junior Systems Developer at Mytelnet, Umhlanga

August 2019 — Present

We use a micro-service architecture, and our main stack is Nodejs, Vue and MySQL/MSSQL/PostgreSQL/Firebase. I'm responsible for developing, maintaining and structuring the micro-services and APIs, from the back-end to what the user sees.

EDUCATION

PC upgrade and Repairs, UniCollege Westrand, Krugersdorp

February 2013 — May 2013

A basic introduction course to how computers work, and the overview of the world of information technology.

Information Technology, Durban University of Technology, Durban

January 2014 — December 2016

Diploma in IT majoring in Development Software and Information Systems. The primary programming language used was C# and Java.

Btech IT, Durban University of Technology, Durban

January 2017 — December 2017

Btech in IT majoring in Software Engineering and Design. My second major was Advanced Development Software, where we mostly learned about data structure, algorithms and code efficiency.
